Education

Shivaji University

B.Tech in Computer Science(Data Science)

Sep. 2022 – May 2025

Kolhapur, Maharashtra

Dr. D. Y. Patil Polytechnic

Diploma in Computer Science

Sep. 2019 – May 2022

Kolhapur, Maharashtra

Experience

Compserv Consultant Pvt Ltd

AI/ML Intern

May 2025 – Nov 2025

Kolhapur, Maharashtra

- Architected and deployed enterprise-grade Generative AI applications using LLMs, Python, and RAG pipelines, collaborating with cross-functional engineering teams
- Built an LLM-powered automation system for handwritten bill processing, reducing manual work by 70 % .
- Led a team of interns in R&D, designing project architectures, evaluating AI frameworks and libraries, and optimizing system performance.
- Built secure cloud-based data storage platform with encryption protocols, audit trail systems, and file tracing capabilities while implementing Docker containerization.

Tvarit Solutions Pvt Ltd

Data Science Intern

Jun 2024 – August 2024

Pune, Maharashtra

- Collected, cleaned, and prepared large datasets for Exploratory Data Analysis (EDA) to support data-driven decision-making for senior data scientists.
- Refactored procedural Python scripts into object-oriented (OOP) structures, improving code modularity, readability, and maintainability.
- Developed automated ETL pipeline to convert raw and tabular data into formatted business reports, reducing report generation time by 80% and enabling real-time insights delivery to stakeholders.

Projects

AutoLog | Python, LLM, Google Gemini

GitHub Repo

- Built a real-time vehicle logging system using OCR, image preprocessing, and LLMs, enabling automated license plate extraction.
- Reduced manual logging effort by 80% through adaptive text recognition, workflow automation, and a production-ready interface.

AI Math Agent | Python, Vector Database, RAG

GitHub Repo

- Developed an intelligent math assistant using FastAPI, React, Gemini API, and Qdrant vector database for semantic retrieval.
- Enabled step-by-step, context-aware solutions for math problems also uses global search and MCP for search in knowledge base to answer only math related answers.

Book Recommendation System | Python, ML, Scikit-Learn

GitHub Repo

- Built a recommendation engine using cosine similarity, KNN, and feature matrix construction for user-item interactions.
- Improved recommendation relevance with combined popularity metrics and dynamic top-5 personalized suggestions.

Technical Skills

Languages: Python, Java, C, C++, R, SQL

Developer Tools: VS Code, PyCharm, Jupyter Notebook, GitHub, Docker, Kubernetes, Google Cloud Platform, AWS

Technologies/Frameworks: Linux, FastAPI, Flask, LangChain, LangGraph, Hugging Face, TensorFlow, PyTorch, Scikit-learn, Pandas, Numpy

Data & Databases: MySQL, PostgreSQL, MongoDB, Supabase, Vector DBs (Pinecone, FAISS, ChromaDB)

AI/LLM Ecosystem: LLMs, Transformers, RAG Pipelines, Embeddings, Prompt Engineering, Fine-tuning

Visualization: Tableau, Power BI, Matplotlib, Seaborn, Plotly, Excel

Leadership / Extracurricular

Activities

- Winner of AI/ML TechSphere College ML Tournament, showcasing strong problem-solving and machine learning skills.
- Led team of students to create a website for rural businesses called as Mahila Bachat Gats under Clg KIC cell.
