SUMMARY

Data Engineer with a PG-Diploma in Big Data Analytics (CDAC) and 14 months of internship experience building **ETL/ELT pipelines**, **data warehouses** and data-driven applications using **Python, SQL, PySpark, Databricks, Snowflake, Airflow, dbt, Kafka** and **AWS**. Hands-on with **medallion architecture**, **dimensional modeling**, **data quality validation**, **SCD Type 2** and **idempotent batch processing**. Also experienced in **Generative AI** and **RAG**.

EXPERIENCE

AI/ML Intern Jan 2025 – Nov 2025
Compserv Consultant Pvt Ltd *Kolhapur, Maharashtra*

- Built a **secure data storage and file-tracking system** with encryption and audit trails, plus **ETL workflows** using **Python, SQL, PostgreSQL, REST APIs** and **Docker**, improving data traceability and scalability.
- Built an **LLM-powered document processing pipeline** for handwritten bills (extract, clean, validate, review in a form, load into **PostgreSQL**), reducing manual effort by 70%.
- Developed **FastAPI** backend services, a **text-to-SQL** support chatbot and a **RAG** application for the company website using **LangChain** and vector databases.
- Performed **data analysis** on client datasets with **SQL** and **Python** (**EDA**, data cleaning, reporting) and contributed to **R&D** on system architecture and LLM framework selection.

Data Science Intern Jun 2024 – Aug 2024
Tvarit Solutions Pvt Ltd *Pune, Maharashtra*

- Developed **automated Python pipelines** to extract data from **AWS cloud storage, PostgreSQL databases** and flat files, apply preprocessing and generate business reports.
- Cleaned and analyzed **industrial data** (**EDA**, statistical analysis) to support senior engineers and data scientists in model and project development.
- Refactored procedural scripts into **modular Python scripts**, improving code readability and maintainability.

TECHNICAL SKILLS

Programming Languages: Python, SQL (Joins, Window Functions), Bash/Shell Scripting
Big Data Technologies: Apache Spark, PySpark, Spark SQL, Databricks, Kafka, Hadoop, HDFS, Hive
Data Engineering: ETL/ELT, Data Pipelines, Batch Processing, Data Ingestion, Data Transformation, Data Quality, Medallion Architecture, Parquet, REST APIs
Warehousing & Orchestration: Snowflake, Delta Lake, Star Schema, Dimensional / Data Modeling, SCD Type 2, Apache Airflow, dbt, Azure Data Factory
Cloud & DevOps: AWS (S3), Azure (Fundamentals), GCP, Docker, Git, GitHub Actions (CI/CD), Linux
Databases: PostgreSQL, MySQL, MongoDB
Analytics & AI: Tableau, Power BI, EDA, LLMs, RAG, LangChain, FastAPI

EDUCATION

Centre for Development of Advanced Computing (CDAC) Pune, Maharashtra
PG-Diploma in Big Data Analytics *Feb 2026 – Aug 2026*

Shivaji University Kolhapur, Maharashtra
B.Tech in Computer Science (Data Science) - 8.2 CGPA *Sep 2022 – May 2025*

Dr. D. Y. Patil Polytechnic Kolhapur, Maharashtra
Diploma in Computer Science - 84.23 % *Sep 2019 – May 2022*

PROJECTS

Reliable Supply Chain Data Pipeline | *Python, PySpark, Kafka, AWS S3, Snowflake, dbt, Docker, PostgreSQL, Tableau* *GitHub*

- Designed an end-to-end cloud data pipeline using **AWS S3, PySpark, Snowflake, dbt** and **Tableau** with **Medallion Architecture** (Bronze, Silver, Gold) layers for scalable analytics.
- Implemented **deduplication, SCD Type 2, data quality validation, dead-letter handling, partitioned Parquet storage** and **idempotent batch processing** for reliable ingestion.
- Built analytics-ready Gold-layer models with **dbt** and **Snowflake External Tables** powering **Tableau** dashboards for revenue, inventory, store and rider performance.

Big Data Sales Analytics Warehouse | *PySpark, SQL, Databricks, Delta Lake, Airflow, PostgreSQL* *GitHub*

- Designed a scalable **data warehouse** on **Databricks, PySpark** and **Delta Lake** with **star schema** dimensional modeling (fact and dimension tables).
- Optimized analytical **SQL** (**joins, window functions**) for business reporting and KPI generation; automated ingestion and loading with **Apache Airflow** into **PostgreSQL**.

Weather Data Pipeline | *PySpark, REST API, PostgreSQL, AWS* *GitHub*

- Built a batch **ETL pipeline** that ingests weather data from a **REST API**, transforms it with **PySpark** and loads it into **PostgreSQL**.

CERTIFICATIONS & LEADERSHIP

Certifications: Cisco Data Analytics, Cisco Introduction to Data Science, Power BI, Advanced SQL
Leadership: Data team lead and backend developer, Mahila Bachat Gat platform (KIC); Winner, AI/ML TechSphere
